

ACCESS TO DENTAL TECHNOLOGY

Reducing Barriers to Licensure and
Employment in Dental Technology

"Helping newcomers get their foreign credentials recognized faster will allow them to join the Canadian work force faster, which is critical to growing our economy and strengthening the middle class. That's why we are supporting newcomers to get credentials recognized so they can kick-start their careers in Canada."

– The Honourable Patty Hajdu, Minister of Employment, Workforce Development and Labour

What you need to know

There are fewer than 2,000 registered dental technologists in Canada and the profession is facing a critical shortage

Members of CADTR-ACORTD share a common interest to ensure an adequate number of qualified and competent internationally and Canadian-educated registered dental technologists/technicians across the country

CADTR-ACORTD secured funding from Government of Canada's Foreign Credential Recognition Program to invest in the Access to Dental Technology (ADT) project

The ADT project is a multi-year, pan-Canadian project that started in December 2017. It will:

- help internationally trained newcomers join the Canadian workforce faster
- launch a website with centralized information on the dental technology profession and licensure
- create pre-arrival self-assessment tools
- establish fair and consistent assessment processes of domestic and internationally educated professionals seeking licensure

WHO WE ARE

The Canadian Alliance of Dental Technology Regulators- Alliance Canadienne des organismes de réglementation de la technique dentaire (CADTR-ACORTD) serves as the collective voice for the governing bodies of the dental technology profession in Canada. Find out more about us at www.cadtr-acortd.ca.
